

Biofeed®

CROP AND SOIL MANAGEMENT PRODUCTS

Use Biofeed and grow sweet, delicious **APPLES!**

Soil Application

Early Rooting: In the soil apply Two (2) Quarts **SOIL-PLUS®** and Two (2) Quarts **CHETROL®** per acre.

Dilute products together in water to allow consistent water-run of ground treatment with irrigation to ensure insertion into the soil.

FOLIAR AND SOIL APPLICATION

Pre-Budding: Foliar Apply Two (2) Quarts **Biofeed CROP®** and One Quart **Micro-9®** Per acre.

Flowering: Soil application Two (2) Quarts **Biofeed CROP®**, One (1) Quart **Micro-9®** and One (1) Quart **Soil-Plus®** per acre.

Fruit Development: Foliar apply Two (2) to Four (4) Quarts **Biofeed CROP®**, One (1) Quart **Cal-6®** per acre.

Maturity: Foliar apply Two (2) to Four (4) Quarts **ReBound®**, Two (2) Quarts **Cal-6®** per acre.

Products required for this protocol: Soil-Plus®, Chetrol®, Biofeed CROP®, Micro-9™, ReBound® and Cal-6™. Some Biofeed® products may react when tank mixed. If reactions occur, stir till diluted and spray.

Dilute all Biofeed® foliar products in adequate water (usually 3-10 gallons per acre) at time of application to ensure efficient coverage of all leaves during application. Dilute Biofeed® soil products in adequate water to allow consistent coverage of soil through the irrigation to ensure complete insertion into the soil.

NOTICE: These recommendations are for general applications. Contact your Biofeed field representative for the ideal treatment program for your specific crop, soil and climate needs. Products such as CROP® and CAL-6™ may react when tank mixed. Stir into solution and spray.
